

High Strength Epoxy Putty

Epoxy based putty is used for leveling of surfaces and filling the gaps between metal to metal joints and also for adhering rubber to metal surfaces

Epoxy Leveling Putty

SALIENT FEATURES

- System : Two component
- Pot life : 2 hour
- Peel strength : > 3 Mpa
- Curing time : 48 hour

Epoxy Leveling Putty Components

AREAS OF APPLICATION

For leveling of structural joints and surfaces
For joining of metal to metal

STATUS

Technology available for transfer
