

FLAME RETARDANT OVERALLS

Flame retardant personal protective clothing for fighter aircraft and aircrew is intended to provide protection to the aircrew in case of unforeseen fire hazards. FR Overalls is essentially made out of inherently flame-retardant meta aramid fabric with comfort finish to meet wicking and moisture vapour transmission properties. Flame Retardant Overalls Airworthiness obtained from RCMA (AC).

Salient features:

- Made out of inherently flame retardant meta aramid and Para aramid fibre blend composition
- Comfort finish to meet wicking and moisture vapor transmission
- Available in different sizes
- TPP rating more than 8
- Low heat release rate and sufficient escape time in the event of fire accident.
- All the components are FR in nature
