

Oleoresin based products like Capsispray™/ Capsigrenade™

Capsispray™/ Capsigrenade™ – an eco-friendly, less than lethal weapon, based on oleoresin extract of chilli (Bhut Jolokia, *Capsicum assamicum*). Capsispray or Capsigrenade contains Oleoresin based solvent formulation. It causes coughing, skin and eye irritation to exposed person. It incapacitates the person for 20 - 45 minutes. Capsi- based products highly suitable for Indian troops/ paramilitary forces for applications in the low intensity conflict (LIC) areas, riot control, protection of vital installations from sabotage, crime prevention, flushing out hiding people as well as civilian applications like personal or area protection & self-defence. Capsi-based products can be used as hand held spray or as hand grenade or thrown through projectile/ launchers as ball or shell or through water cannon as fine spray. They have *no explosive fuse for burning chilli powder*, thus does not need any approval from explosive agency.
