

UV Protective Anti-Blemishes Cream

UV protective cream with anti-photoageing and anti-blemishes properties is an herbal formulation that contains Seabuckthorn seed oil as a major ingredient. The formulation also contains uvinul t 150-ethyl hexyl triazone, uvinul mc 80-ethylhexyl methoxy cinnamate, tinisorb m-methylene bis-benzotriazolyl tetra methylbutyl phenol, uvinul a-diethyl amino hydroxyl benzoyl tetra methylbutylphenol, tinosorb-bis-ethylhexyloxyphenol methoxyphenyl triazine, petroleum jelly, isopropyl myristate (IPM), and other compounds. The formulation does not contain zinc and has UV protective efficacy equivalent to SPF > 45 along with anti-blemishes and skin healing properties. The formulation can be used as a prophylactic for low humidity and UV mediated skin damage at high altitude.

Apply the product topically on the skin. Do not use if skin irritation, burning sensation or itching occurs. No adverse effect has been reported on topical application.
