

LONG LASTING INSECTICIDAL MOSQUITO NET (LLIN) (DEFENDER NET™)

<p>Description in brief</p>	<p>Defender net™ is a long lasting insecticidal mosquito net (LLIN) and an insecticide is incorporated in the high density polyethylene (HDPE) yarn during its manufacturing. A safe synthetic pyrethroid is incorporated in such a way that net yarn always has bare minimum insecticide and just sufficient to repel or kill the landing mosquitoes to feed on sleeping person inside the net. On loss of insecticide from the yarn surface due to washing or use then insecticide from the core of yarn migrates to the surface in a controlled fashion and thus again giving mosquito control capability to the net.</p>
<p>Application/use of product</p>	<p>This product is made for protection from mosquitoes' bites while sleeping. It is wash resistant and remains effective even after 20 washes and upto 6 years</p>
<p>Salient features</p>	<p>Ready to use safe mosquito netting with pleasant fragrance and good breathability. Highly effective and does not require retreatment</p>
<p>Direction for use</p>	<p>Use defender net in place of regular mosquito net during the night hours</p>
<p>Shelf life and storage condition</p>	<p>Best before 5 years of manufacturing</p>
