Military Technology and Equipment

Website: <https://www.smi-online.co.uk>

(1) Air Missile Defence Technology

Date: 24-25 October 2017

Place: Prague, Czech Republic

Selective topics:

Air space is becoming increasingly complex and dangerous. Smart missile systems, the proliferation of cheap drones and unconventional warfare mean the risk to air and ground forces are high. Therefore, troops require effective ground based sensing, commanding and firing solutions to defend fixed positions, mobile formations and critical nation infrastructure. This conference will bring together air defence operators, decision makers and technical experts from both the military and industry. Through national updated and highly focused presentations on key AMD issues such as Ballistic Missile Defence, C-RAM and Aerial Surveillance Fire Control; participants will be able to discuss the risks and the solutions available now and in the future to defeat threats from the air including missiles, rockets, artillery planes and unmanned aerial vehicles.

Defence & Communication

(3) Social Media in the Defence & Military

Date: 6-7 December 2017

Place: London, United Kingdom

Selective topics:

Social Media is a constantly evolving communication outlet for any industry and has only recently seen military and defence organisations tapping in to this tool on a scale of comment – as a consequence most militaries

are still lacking in any notable form of social media strategy or operational outfit specific to these platforms of communication. Social Media is therefore still a big area in need of knowledge sharing for the community. The face of social media is constantly changing and adapting to current trends, fashions, and threats and this is something that is important to any modern industry to understand, especially the military and defence sector.
