

1. Name of the technology: Manufacturing Technology for STANAG-6 (30mm AP) Armour Panels

2. Developed by DRDO Lab/ Esstt. Name: R&DE(E), Pune

3. Brief write-up: The future MBTs/Light Tanks/FICVs require light weight armour protection. One of the major requirements of armed forces is light weight STANAG-6 armour for vehicles.

R&DE(E),DRDO has successfully developed and tested light weight armour solution as per STANAG-6 (30mm AP) requirements. R&DE(E), DRDO has carried out multiple design iterations and simulations to achieve light weight indigenous armour solution for STANAG-6 level. A novel armour manufacturing method was evolved for realization of these panels. The panels have undergone extensive testing and all requisite parameters were achieved as per STANAG-6 (30mm AP). The complete manufacturing know-how involving bill of materials manufacturing process, quality assurance plan and test details will be provided with this technology. This technology will pave the way for development of indigenous armour solutions against other medium caliber ammunition as well. This ToT is for development of armour at panel level.
