

## Liquid Meal

Liquid meal is available in the form of ready-to-drink liquid and packed in suitable polymeric packaging. The product is stabilized using thermal processing technique and provides 110 Kcal (cocoa) and 80.0 Kcal (mango) energy per 100 ml of liquid meal. Liquid meals have been fortified with essential micronutrients such as vitamin C, E, vitamin B<sub>1</sub>, B<sub>2</sub>, B<sub>3</sub>, B<sub>6</sub>, B<sub>12</sub>, folic acid, minerals such as calcium, selenium and zinc. Ginger, turmeric and tulsi extracts have been added to liquid meals which act as powerful antioxidants besides their vital roles and have immune boosting property. Two variants are available in liquid meals: (a) cocoa and (b) mango based. The product is shelf stable for 9 months under ambient storage conditions.
