# >>> ICDMAI 2023

We, the Organizing Chairs of the Conference, feel honoured to introduce to you and invite you for the 7th International Conference on Data Management, Analytics and Innovation (ICDMAI 2023) scheduled from 20–22 January 2023 at Defence Institute of Advanced Technology, Pune. ICDMAI is a flagship conference of Society for Data Science (S4DS), which is a non-profit professional association to create a collaborative platform for bringing together technical experts across Industry, Academia, Government Labs and Professional Bodies to promote Innovation around Data Science.

The ICDMAI 2023 envisions its role towards data management as well as analytics and its enhancement through collaboration, innovative methodologies and connections throughout the globe. In this direction, the mission is to deliver and coordinate, enact and disseminate research as well as resources that enhance the impact and growth of education pertaining to the theme of the conference. The primary goal of the conference is to promote research and developmental activities around data science, which is our primary focus. Another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working in India and abroad. The conference is organized every year to make it an ideal platform for people to share their views, results and experiences

# >>> TRACKS & TOPICS

Seventh International Conference on Data Management, Analytics and Innovation (ICDMAI – 2023) solicit papers in the areas of specific research domains from all viewpoints are invited from delegates all over the globe. It is planned to submit selected and presented original, unpublished research papers in the proceedings with SPRINGER in their prestigious Lecture Notes in Networks and Systems (LNNS) series, which is indexed by SCOPUS, INSPEC, WTI Frankfurt eG, zbMATH, SCImago and all books published in the series are submitted for consideration in Web of Science. Following are the topics of interest but not limited to:

# TRACKS & TOPICS

## **Track I: Machine Learning**

Algorithms and Models, Feature Engineering, Supervised Learning – Classification, Regression, Unsupervised Learning, Semi-supervised Learning, Association Rule Mining, Recommendation System

## **Track II: AI & Deep Learning**

Heuristic Search, nature inspired search, Fuzzy and Rough Set, Reinforcement Learning, ANN and Deep Neural Networks, RNN, CNN, RBM, Transformer, Auto Encoder, GAN, Transfer Learning, Application in Computer Vision, Natural Language Processing, Time Series Data, Other research Issues and Interdisciplinary applications in Science, Social Science and Humanities

## **Track III: Data Storage, Management And Innovation**

Data Storage, Data warehouse and Data Lakes, Retrieval, Graph database, No SQL, Column based databases, Other contemporary issues and Techniques

## **Track IV: Enabling Technologies**

Big Data, Cloud Computing, IoT, Robotics, Block Chain, Security and Privacy, Bio-Informatics

## **Track V: Data Science Techniques For Handling Epidemic, Pandemic**

Forecasting models for Tracking Number of affected, Image Processing Techniques for detection of disease, Applying Text Analysis to understand research articles to get a better understanding of the Research Literature, Drug Discovery and Genomic Sequencing, Assessing the business and Economic Impact of an Epidemic and Pandemic, Social Media Analytics to understand the Sentiments, Specific issues of Concern, Building Conversation Agents to communicate genuine information
